EXPERIENCE

Frontend Web Developer Intern

ROC.PH Digital Marketing Service

Sep. 2018 – Nov. 2018

General Trias City, Cavite

- Developed and implemented responsive frontend features and interactive UI components for the company's public-facing website using HTML5, CSS3, and JavaScript.

Information Technology Intern

Phosclay Chemical Manufacturing

Oct. 2022 – Dec. 2022

Dasmariñas, Cavite

- Developed and implemented new sections, including services and products pages, with interactive animations for the company's public-facing website using HTML5, CSS3, and React.
- Created video montage and publication advertisements for the product promotion of the company.
- Managed company social media platforms such as TikTok, Shopee, to promote products and services.

PROJECTS

Dapper Fit | *HMTL, CSS, Typescript, Next.js*

- Developed a interactive modern ecommerce web application where users order and pay clothes online.
- Users can sign up/login and admin can manage order products and users.
- Flexible payment using Paypal or Cash on Delivery.
- Implemented admin area with stats and chart using to keep track of expenses and billings.

Property Hub | *HMTL, CSS, Typescript, Next.js, MongoDB, NextAuth*

- Developed a property listings web application where users can browse, add, bookmark, and search properties.
- Implemented internal messages functionality with 'unread' notifications to communicate between the property owners and users.
- Implemented maps to view the location of each property.
- User authentication with Google and Next Auth for secured login.

Shorten.it | *HMTL, CSS, Typescript, React, Java Spring Boot*

- Developed a URL shortener web application to easily transform long, complex web addresses into shorter, more manageable links.
- Subdomain-based routing and Short URL Graph Analytics.
- User authentication with Spring Security and JSON Web Tokens.

Workhive | *HMTL, CSS, PHP, Laravel*

- Developed a job listing web application where users can apply for jobs and employers can post jobs.
- Users can sign up/login and admin can manage order products and users.
- Implemented maps to easily search job location and email users after a successful job application.
